

Project Hour Tracking

Combined Estimate: 20 hours

- Based on our experience from EECS168 and EECS268, we feel confident that we can implement project 1 within this time estimate. Most of our time will be spent developing the game and board logic. It should also be noted that we are all fairly unexperienced working in a team setting like this, so additional time will be required to handle merging, discussion of individual tasks, etc.
